fortunenwohiri@gmail.com

SUMMARY

I'm a detail-oriented team player with strong organizational skills and I seek the opportunity to create dynamic and user-friendly web applications with you. I can handle multiple projects simultaneously with a high degree of accuracy. I plan and prioritise well to complete multiple tasks simultaneously and within deadlines. I learn quickly to develop the skills required for success. I freelance currently. I have built a good amount of projects. I believe in skill test than portfolio so if you're open to that it would really showcase my skills more.

SKILLS

HTML, CSS, Core PHP, PHP MVC System, Laravel, Javascript ES6+, Typescript, React Js, Next Js, Nest Js, Bootstrap, Tailwind CSS, MySQL, Laravel (SaaS), Version Control System (Git), GitHub, VS Code, PHP Storm, PHPMyAdmin, Laravel (Livewire, Jetstream), Team contributor, Great communication skills, Great team membership skills, Problem-solving skills, Crypto Community moderator & manager, [Ghostwriter](#) .

EXPERIENCE

1. Full Stack Web Developer

Adrenaline Express, D&B & COs | Nigeria
 Sept 2021 – Present
 Technologies: Core PHP, Laravel, MySQL, HTML, CSS, Bootstrap, JavaScript
 Key Achievements:

- Developed and maintained full-stack web applications using PHP (Core & Laravel).
- Created responsive user interfaces and optimized experiences across mobile and desktop.
- Built robust backend logic and efficient database structures.
- Worked with clients directly to gather requirements and deliver tailored solutions.
- Collaborated with multi-functional teams to deliver projects on time.

2. Independent Projects & Framework Development

Freelance / Personal Projects
July 2023 – Present
Technologies: PHP, Custom MVC (Frames), MySQL, HTML, CSS, Bootstrap, JavaScript
Key Achievements:

- Built a custom MVC framework ("Frames") with CLI tools, routing, views, and session management.
- Created **ProInvest**, an investment platform using Frames, with user/admin panels and secure authentication.
- Delivered **CodeGIGs**, a job listing platform with email verification, user dashboard, and gig management tools.
- Ensured projects were scalable, secure, and deployed via platforms like GitHub and Cloud Panel.

---

3. Backend Developer – Modern JavaScript Stack

Vikmid & TadHamInvest | Remote
Aug 2025 – Present
Technologies: NestJS, Node.js, Next.js, React, Tailwind CSS, TypeScript
Key Achievements:

- Contributed to full-stack development of modern web apps using TypeScript and JS frameworks.
- Built APIs using **NestJS** and handled backend logic for investment and marketplace platforms.
- Developed front-end interfaces with **Next.js** and **React**, ensuring seamless user interaction.
- Worked in a team of developers delivering production-ready, scalable services.

EDUCATION

Federal Government College Ijanikin, Lagos, Nigeria - *Sciences*
09/2015-07/2021
GCSEs, WASSCEs, JAMB

Nnamdi Azikiwe University, Awka, Nigeria *- B.Sc. Computer Science*

05/2023 - PRESENT

Data Structures and algorithms, Database Management Systems, Computer Networks, Operating Systems, Cloud Computing, Object Oriented Programming, Full Stack development, Machine learning, Formal Languages and Automata, Cryptography and Security, Unix Tools and Scripting

PROJECTS

CODEGIGS | Developer

SEPT 2023 – PRESENT

CodeGIGs is a job listing website. It's a platform where users can sign up to post gigs, view posted gigs, sign up and verify their email, forget password functionality, and manage gigs only posted by the logged-in user. The database can store thousands of users. Technologies used:

- Front-End: HTML, CSS, Bootstrap & Javascript ES6+
- Back-End: PHP & Laravel
- Database: MySQL
- Deployment: Cloud panel

FRAMES | Developer

JULY 2023 – PRESENT

This is an MVC framework I created to almost work like Laravel, it performs routing, modelling, viewing & controlling. It has a default home page design, pagination (based on information from the database and it comes with filters too, you can also edit the design of the pagination), Image editor, and command line tool called skeleton (which can perform migrations, make controller and models and finally perform some db commands), a built-in login, signup and logout system, built-in session classes which possess methods for easier session accessibility etc. It's not yet a composer package so it can't be downloaded but it's available on my GitHub.

- Front-End: HTML, CSS, Bootstrap & Javascript
- Backend: PHP MVC Framework
- Database: MySql
- Deployment: GitHub

PROINVEST | Developer

August 2023 – present

Proinvest provides investment plans that aim to bring profit to its users. It has a panel for both users and admin. Users can log in, sign up, verify email and change passwords. It was created with an MVC framework I built from scratch.

- Front-End: HTML, CSS, Bootstrap & Javascript ES6+
- Back-End: PHP & Frames

Vikmid | Developer

August 2025 – present

A website built for creators to render service to their fans. This service was built and still being built by me and a team of 4 devs. If you want to access the full functionality please sign up. I built the Nest Js API and also some part of the UI with Next Js
[Vikmid](#)

- Front-End: Next Js, Typescript & Tailwind CSS
- Back-End: Nest Js & Typescript

TadHamInvest | Developer

August 2025 – present

A full-stack Investment broker built with React Js and node Js backend, i am responsible for the design and some part of the backend, this is the link to the website [TadHamonFinance](#)

- Front-End: React Js & Tailwind Css
- Back-End: Node Js.

ACHIEVEMENTS

2021: Successfully finished a web development course at DMT Computers, Nigeria with 2 nd position among my colleagues

2023: Successfully created an MVC framework from scratch

2024: Fully built my portfolio with React Js
2025: Built a bot with my team that helps users withdraw their Pi tokens from their wallets automatically, if their wallets have been compromised, cannot share the link because its highly confidential. It's a hacking kind of gig.
