

Fortune Nwohiri

Full-Stack Engineer · Systems Architect · Automation Engineer

✉ fortunenwohiri@gmail.com · 🌐 fortune-nwohiri.vercel.app · 🇳🇮 Nigeria

TECHNICAL SKILLS

Languages: TypeScript, JavaScript (ES6+), PHP, Python, SQL

Frontend: Next.js, React.js, React Native, Tailwind CSS, Bootstrap, GSAP

Backend: NestJS, Node.js, Laravel, REST APIs, WebSockets

Databases: PostgreSQL, MySQL, MongoDB, Redis

Infrastructure: Ubuntu VPS, PM2, Nginx, Certbot, Docker, Cloudflare DNS

Integrations: Paystack, Flutterwave, Brevo SMTP, BullMQ, Puppeteer, Telegram Bot API

Tools: Git, GitHub, TypeORM, Swagger, Redux, React Query, VS Code, PhpStorm

WORK EXPERIENCE

Full-Stack Developer Intern | *Vikmid & TadHamInvest*

08/2024 – 07/2025

- Built and integrated production-grade REST APIs using NestJS and TypeScript across Vikmid and TadHamInvest platforms, with emphasis on performance and security.
- Developed Next.js and React frontends with Tailwind CSS, delivering fully responsive and polished user interfaces.
- Operated within an Agile team, improving platform reliability and delivery velocity across sprint cycles.

Full-Stack Developer (Volunteer) | *Adrenaline Express, D&B & COs*

09/2021 – 07/2022

- Built and maintained scalable web applications using Core PHP, Laravel, MySQL, HTML, CSS, Bootstrap, and JavaScript.
- Optimised database performance and query efficiency, resulting in measurable speed and UX improvements.
- Collaborated cross-functionally to deliver custom client solutions from concept to deployment on schedule.

PROJECTS

Phlox AI — Influencer Marketing Platform | *Solo Build · getphlox.com*

2024 – present

- Architecting a full influencer marketing platform for the Nigerian market, built solo from zero.
- Backend: NestJS with TypeORM, PostgreSQL, Google OAuth, email flows via Brevo SMTP, Swagger docs, health check endpoints.
- Frontend: Next.js with Redux, React Query, GSAP-animated landing page, complete onboarding wizards for brands and creators.
- Milestone 1 shipped — auth, entity layer, onboarding, and landing page complete and deployed.

FortunePay — P2P Trading Automation Bot | *Solo Build · Production*

2024 – present

- Built a fully automated P2P trading bot targeting the Bybit exchange — NestJS/TypeScript backend deployed on a Hostinger KVM VPS (Ubuntu).
- Manages live BUY and SELL ad cycles, dynamic ad pricing, payment method routing (OPay, PalmPay, Kuda, Bank Transfer), and market buyer scanning.
- Stack: PostgreSQL for trade records, Redis for state management, BullMQ for job queues, PM2 for process management, Puppeteer for session persistence.
- Integrated Paystack and Flutterwave for automated NGN disbursements. Achieved REGULAR advertiser tier on Bybit, unlocking simultaneous BUY/SELL ad slots.
- Telegram bot interface for real-time controls — start/stop/configure without touching the server.

LexiconofCryptix & Web3Veir — Investment Platforms | *Client Builds · Production*

2023 – 2024

- Designed and deployed two crypto investment platforms end-to-end on Sailex shared hosting using a flat Laravel structure.
- Implemented SMTP transactional email via Brevo (port 2525), SSL via Cloudflare, QR/barcode upload systems, and wallet connect pages.
- Built auth systems, admin dashboards, role-based access, and a wallet connect bot/spam protection layer using throttle middleware, honeypot fields, and timestamp validation.

PadiDrive — Driving School Platform | *Client Build · IONOS VPS*

2023 – 2024

- Developed a full driving school management platform — scheduling, booking flows, instructor dashboards, and student portals.
- Deployed on api.padiDrive.com (IONOS VPS), managed with Nginx and Certbot for HTTPS.

Vaultmere — Fintech Reward Platform Proposal | *Client Pitch*

2024

- Authored a full technical proposal (₦2,000,000 contract value) for a NestJS/Next.js fintech reward platform.
- Covered system architecture, API design, database schema, and phased delivery milestones.

Independent Projects & Framework Development | *Self-Directed*

06/2023 – present

- Built Frames — a custom PHP MVC framework with CLI tooling, a routing engine, and session management.
- Developed ProInvest, a role-based investment platform with admin dashboards and secure authentication.
- Built CodeGIGs, a scalable job listing platform with email verification, user dashboards, and gig management.

EDUCATION

B.Sc. Computer Science | *Nnamdi Azikiwe University, Awka*

Aug 2023 – Oct 2026 (expected)

- Relevant coursework: Data Structures & Algorithms, Database Systems, Computer Networks, Cloud Computing, Full-Stack Development, Operating Systems, Cryptography & Security.
- Final-year project: Design and Implementation of a Crowd-Sourced Road Damage Detection and Reporting System Using Computer Vision.

GCSEs, WASSCEs, JAMB | *Federal Government College Ijanikin, Lagos*

Sept 2015 – July 2021
