SKILLS

Languages & Frameworks: HTML, CSS, JavaScript (ES6+), TypeScript, PHP (Core & Laravel), Python

Frontend: React.js, Next.js, Bootstrap, Tailwind CSS

Backend: NestJS, Node.js, Express.js, Laravel, REST APIs

Databases & Infrastructure: PostgreSQL, MySQL, MongoDB, Redis, BullMQ, Docker, TypeORM

Automation & Bots: Python (Selenium, SeleniumBase, Telegraf, Requests), Puppeteer, Playwright, Nest.js

AI & Agents: Anthropic Claude API, prompt engineering, multi-agent orchestration, pgvector

Tools: Git, GitHub, VS Code, PhpStorm, Postman, Swagger, PM2, Nginx, Certbot, Linux VPS

Soft Skills: SaaS Architecture, Problem Solving, Detail Orientation, Time Management, Team Collaboration

WORK EXPERIENCE

Founder & Solo Developer — Phlox *Present*

AI-native influencer marketing platform for Nigerian brands

- Building the full-stack platform solo — NestJS backend, Next.js frontend, PostgreSQL, Redis, BullMQ.
- Designing and implementing five AI agents (sourcing, outreach, review, onboarding, performance) using the Anthropic Claude API.
- Architecting a shared creator cache layer with SociaVault and Phyllo integrations for real-time creator data across Instagram, TikTok, YouTube, Twitter, and Snapchat.
- Validated problem through LinkedIn content that hit 10,000+ impressions in one week, gaining 20 followers from brand managers and agency founders who confirmed the pain directly.
- Waitlist launching August 7, 2026. MVP target August 30, 2026.

Community Manager (Part-time) — Fasqon *2025 – Present*

Crypto-native B2B neobank

- Managing and growing the Fasqon Telegram community with daily content including quizzes, insights, and discussion questions.
- Built The-Supporter — a NestJS Telegram bot that handles community support ticket creation and routes tickets to the team support group and official email automatically.
- Producing community content calibrated to B2B professional standards under supervisor direction.

Vikmid & TadHamInvest — Full-Stack Developer Intern *09/2024 – 03/2025*

- Built and integrated scalable APIs using NestJS and TypeScript, ensuring performance and security.
- Developed Next.js and React UIs with Tailwind CSS, delivering responsive and polished user experiences.
- Collaborated in an Agile team to enhance platforms like Vikmid and TadHamInvest, improving reliability and delivery speed.

Independent Projects & Framework Development — Full-Stack Development *06/2023 – 02/2024*

- Built a custom MVC framework (Frames) with a CLI tool, routing engine, and session management.
- Developed and deployed ProInvest — an investment platform with role-based access, admin dashboards, and secure authentication.
- Created CodeGIGs, a scalable job listing platform with email verification, user dashboards, and gig management.

Adrenaline Express, D&B & COs — Full-Stack Developer Volunteer *12/2022 – 04/2023*

- Developed and maintained scalable full-stack web applications using Core PHP, Laravel, MySQL, HTML, CSS, Bootstrap, and JavaScript. Built an Ecommerce for Adrenaline at the time. adrxp.com
- Optimized performance and database efficiency, enhancing speed and user experience.
- Collaborated with teams to deliver custom client solutions from concept to deployment.

PROJECTS & BOTS

[Phlox — AI-Native Influencer Marketing Platform](#) *Jun 2026 - Present*

- Full-stack solo build. NestJS, TypeScript, PostgreSQL, Redis, BullMQ, Next.js, Anthropic Claude API.
- Five AI agents handling sourcing, outreach, contract generation, content review, and creator payouts automatically.

[FortunePay — Bybit P2P Trading Automation Bot](#) *Apr 2026 - May 2026*

- Automated Bybit P2P trading bot running live on a Hostinger KVM VPS with PM2 process management.
- Handles ad management, buyer scanning, payment verification across OPay, PalmPay, and Kuda, and Bybit session management via Puppeteer. Stack: NestJS, TypeScript, PostgreSQL, Redis, BullMQ, Telegram Bot API, Paystack.

[YouTube CTR Bot — Engagement Automation Bot](#) *Aug 2025 – Nov 2026*

- Python bot that logs into YouTube using multiple Gmail profiles and likes target comments at scale.
- Uses SeleniumBase with undetected Chrome, fingerprint spoofing, WebRTC control, timezone spoofing, and proxy rotation to bypass platform detection. Each account runs in an isolated Chrome profile with automatic cache clearing.

[Google Traffic Generation Bot](#) *Dec 2025 - Mar 2026*

- Python bot that generates thousands of simulated users that browse pages, click buttons, scroll through content, and read it. Driving traffic metrics programmatically at scale.

[Pi Network Auto-Withdrawal Bot](#) *February 2025 - May 2025*

- Monitors Pi Network nodes and spams multiple transactions the moment a Pi coin unlocks, blocking prior wallet holders from claiming it and securing coins to the target wallet automatically.

[OndictsPredicts — Sports Betting Analysis Bot](#) *Present*

- AI-powered sports betting analysis bot with a Telegram Bot UI and NestJS backend. Uses Odds API, GNews API, API-Sports, and News API to pull live odds, historical stats, and news sentiment. GPT-5.6-sol acts as the AI decision-making agent to generate smarter betting recommendations across football, NBA, NFL, MMA, MLB, and NHL.

[The-Supporter — Fasqon Telegram Support Bot](#) *Nov 2025 - Jan 2026*

- NestJS Telegram bot powering the Fasqon Support Bot. Community members create support tickets for unlisted issues directly from Telegram. Tickets are routed automatically to the support group and official email with a unique reference number.

[PadiDrive — Driving School Management Platform](#) *Jun 2026 - Jul 2026*

- Full client project deployed on IONOS VPS with Nginx, Certbot SSL, and PM2. Complete driving school management system.
